Aqua T.M.G. Series - TMG2

Application for AMD and intel systems

NOTE:
Before installing, please make sure that the connectors on the radiator are tightened properly.

2.

Install Water tube >>

Combine with iTube series

(The tube is not included the product)

There are two sizes of UV tube, 1/4" and 3/8", these are easy to fit your liquid cooling system. Please refer to Thermaltake website at <http://www.thermaltake.com>

P/N:CL-W0045
CL-W0055

Unscrew the nut of 24cm radiator.

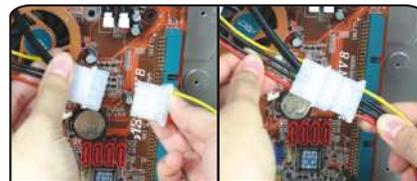

Insert a tube through the nut.

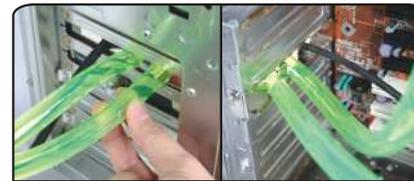

Tighten the nut onto the 24cm radiator quick connector. Repeat the steps for the second tube.

Insert the wire from 24cm radiator to the PCI bracket. Replace the PCI bracket bundled in the package to one of the free PCI slots and secure it by screw(C).

Connect the 4-pin connector of 24cm fan to power supply.

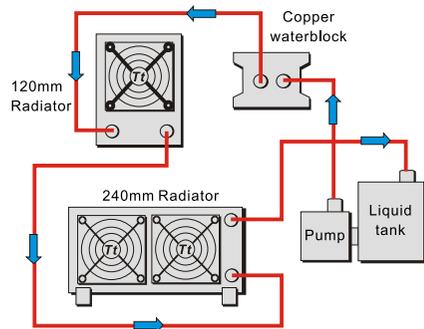

Insert the tube from 24cm radiator through the hole on PCI bracket.

Installation complete
